

curiosity-radar: astronomy

QID: Q_EVAL_ASTRONOMY | Languages: uk | Project: astronomy-uk
Date range: 2024-09-23 to 2026-09-23 | Generated: 2026-09-26T11:51:13.215689+00:00

'astronomy' on uk: strong evidence of growth.

Confidence & data

Project date range start: 2024-09-23
Project date range end: 2026-09-23
[uk] Data days: 731
[uk] Zero-view days: 0
[uk] Theil-Sen slope/day (with spikes): 0.000000
[uk] Mann-Kendall p-value (with spikes): 0.000000
[uk] Mann-Kendall tau (with spikes): 0.639548
[uk] Theil-Sen slope/day (excluding spikes): 0.000000
[uk] Spikes detected: 1
[uk] Placebo basket size: 0
[uk] Placebo percentile: 0.0

Assumptions

Views shown as % of project-wide daily traffic (agent=user), not raw counts. Date range reflects exclusions already applied.

Limitations

Pageview data reflects Wikipedia readership only, not search demand, app-store demand, or purchase intent. Short/noisy series near AQS's actual history start date are unreliable. Topic-to-article mapping can be imperfect for ambiguous topics. All comparisons are normalized (share of project traffic), not raw counts.
