

curiosity-radar: intermittent fasting

QID: Q_EVAL_FASTING | Languages: pl, cs | Project: if-pl-cs
Date range: 2024-09-23 to 2026-09-23 | Generated: 2026-09-25T18:01:29.388199+00:00

'intermittent fasting' on pl: strong evidence of growth.

Confidence & data

Project date range start: 2024-09-23
Project date range end: 2026-09-23
[pl] Data days: 731
[pl] Zero-view days: 0
[pl] Theil-Sen slope/day (with spikes): 0.000000
[pl] Mann-Kendall p-value (with spikes): 0.000000
[pl] Mann-Kendall tau (with spikes): 0.879849
[pl] Theil-Sen slope/day (excluding spikes): 0.000000
[pl] Spikes detected: 1
[pl] Placebo basket size: 0
[pl] Placebo percentile: 0.0
[cs] Data days: 731
[cs] Zero-view days: 0
[cs] Theil-Sen slope/day (with spikes): 0.000000
[cs] Mann-Kendall p-value (with spikes): 0.000000
[cs] Mann-Kendall tau (with spikes): 0.191125
[cs] Theil-Sen slope/day (excluding spikes): 0.000000
[cs] Spikes detected: 0
[cs] Placebo basket size: 0
[cs] Placebo percentile: 0.0

Cross-language ranking

1. pl — strong evidence of growth
2. cs — likely growing

Assumptions

Views shown as % of project-wide daily traffic (agent=user), not raw counts. Date range reflects exclusions already applied.

Limitations

Pageview data reflects Wikipedia readership only, not search demand, app-store demand, or purchase intent. Short/noisy series near AQS's actual history start date are unreliable. Topic-to-article mapping can be imperfect for ambiguous topics. All comparisons are normalized (share of project traffic), not raw counts.
